

Can We Break It!
www.dakotamicro.com

Since we here at Dakota Micro, Inc. claim to build the toughest cameras around, we feel it's our responsibility to test them appropriately. Our methods may not always be orthodox, or come with pedigreed certification (we have those too, but they're BORING!), but they are usually interesting, sometimes comical, and always answer our one burning question... *Can We Break it™?*

Take a look and at the very least, be entertained...and at the very best, realize that you simply cannot live without one of these amazing cameras... and they're built right here in the USA.

Dakota Micro, Inc.
LEADERS IN INDUSTRIAL CAMERA TECHNOLOGY

DM is an American company that shares the values of American farmers and ranchers. Dakota Micro essentially created the demand for cameras in the agricultural industry and we pride ourselves on being the leaders in industrial camera technology, offering you products that are more reliable, more capable and, in the end, more profitable to you, our customers. We strive to always build the best product, provide the best support, and know customer demands and needs better than any other company in this market.

AgCam®

Versatility... the AgCam Goes Where You Need to See!

Top 10 Uses

- 1) **Grain Augers** – place a camera on the end of an auger for your combine or grain cart to ensure accuracy while unloading on the go
- 2) **Guidance Integration** – plug your camera into your tractor or combine's existing monitor with an adaptor
- 3) **Forage Harvesters** – camera on the end of the spout to direct forage into the wagon on the go
- 4) **Air Seeder Tank** – observe tank levels day or night using high-performance infrared illuminators
- 5) **Sprayer Booms** – view booms to ensure proper nozzle function and to see traffic behind you
- 6) **Combine Hopper** – monitor your combine hopper with a clear view before you over-fill
- 7) **Balers** – watch your bales be wrapped and unloaded with peace of mind
- 8) **Cattle Barns/Parlors** – watch your cattle in the comfort of your home with our wireless equipment any time of day
- 9) **Grain Dryer** – monitor alarms, moisture percentage, temperature and rate with our AgCams
- 10) **Planters** – watch for trash build, bearing failure, and monitor seed levels with your AgCam

Unsurpassed Dedication to Quality & Performance...

That's Dakota Micro!
